# Curvebeam to integrate IBEX Trueview<sup>®</sup> scatter correction in the LineUp product

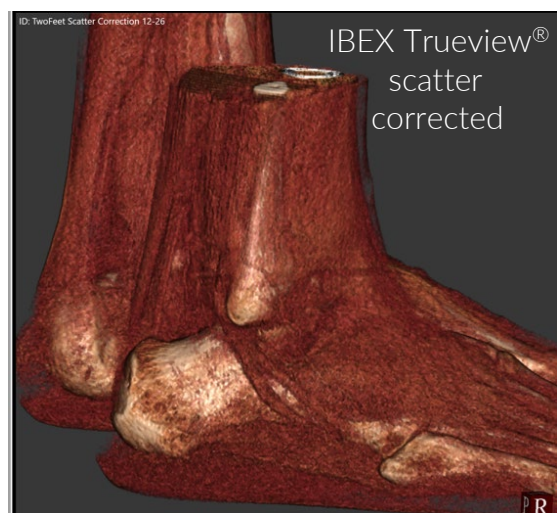

Curvebeam LLC and IBEX Innovations Ltd have entered into an agreement to incorporate IBEX Trueview<sup>®</sup> scatter correction software into the Curvebeam LineUp multi-extremity CT imaging system.

Curvebeam President Arun Singh comments: "IBEX Trueview<sup>®</sup> is highly effective in estimation and virtual elimination of image contamination due to scatter radiation, resulting in improved bone segmentation and enhanced visibility of soft tissue in our performance-leading LineUp product."

Dr Neil Loxley, CEO of IBEX adds: "We are delighted that a market leader in weight-bearing CT imaging has chosen to adopt Trueview. The deal with Curvebeam is a great validation of the value of our physics-based scatter correction methods."

High resolution slices of a human foot in sagittal plane  
IBEX Trueview<sup>®</sup> increases bone contrast by 37% and tissue contrast by 53%
